- Electronic Audit Trails for Transparency and Compliance
- Budget Validation
- Flexible Invoice Approvals

eRequest

Microsoft Dynamics
365 Business Central

A user friendly Microsoft Teams App that boosts efficiency and frees up valuable time.

Benefits

Stronger Spending Control – Reduces rogue purchases and helps enforce procurement rules.

Informed Financial Decisions – Delivers insights into procurement operations, highlighting areas for improvement.

Efficiency in Procurement – Automates approvals and introduces scalable requisition processes, handling complex approval structures seamlessly.

Prevent Spending Leaks – Ensures employees purchase only from approved vendors, reducing risks and errors.

Centralized Data Management – Integrates with Dynamics 365 Business Central, offering a unified platform for procurement data.

What our customers are saying

“ We needed to be able get approval for capital expenditure from the relevant project managers rather than line managers. Separate approval routes were established for opex and capex. We chose eRequest because the system was able to be adapted to facilitate the complex approval matrix that we required.

As a result of using eRequest, we have improved the financial control and governance around spend in all areas of the business.”
