

Electronic Payments

Oracle NetSuite

Improve efficiency and security for domestic and international payments - expediting and streamlining processes through automation.

Overview

Nolan's Electronic Payments (EP) with Payments Direct automates and secures vendor payments for both domestic and international transactions. It simplifies complex payment processes, reduces manual effort, and ensures compliance with bank and country-specific regulations.

By integrating directly into Oracle NetSuite, it eliminates security risks from external applications while providing seamless payment processing for ACH, wires, checks, virtual cards and more.

Key Features

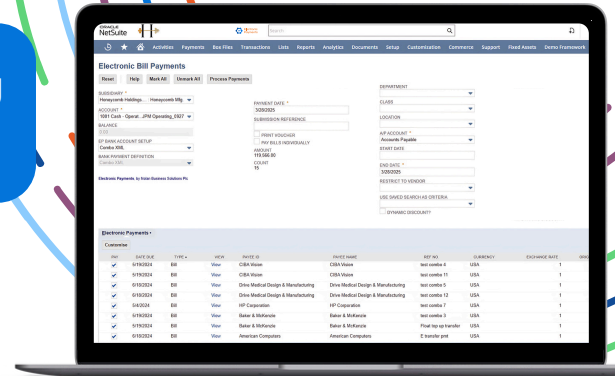

- Multi-Format & Multi-Currency Support
- Domestic & International Payment Handling
- Manages Payments Without Third-Party Apps
- Integrated Vendor Bank Details Approval Process
- Preconfigured Bill Payment Approval Module
- Automates Payment File Transfers to Banks
- Advanced Security & Compliance
- Multiple Vendor Bank Details
- Automated Remittance Notifications

Electronic Payments

Oracle NetSuite

Simplify complex payments while maintaining full control within Oracle NetSuite.

Benefits

Improves Efficiency – Automates payment processing, reducing manual work and errors.

Enhances Security – Keeps payment processing within NetSuite, eliminating risks associated with third-party data transfers.

Supports Global Scalability – Handles payments in different formats and currencies with ease.

Reduces Processing Delays – Eliminates bottlenecks by automating payment file transmission to banks.

Increases Control Over Payments – Provides full visibility and approval processes within Oracle NetSuite.

What our customers are saying

“Nolan Electronic Payments makes my life so much easier! It is so efficient, and we have recently implemented globally since it was so useful for the US. Could not recommend enough!”
